VOL. 15 JOURNAL OF ANALYTICAL AND APPLIED PYROLYSIS MARCH 1989

Special Issue

Proceedings of the Analytical Pyrolysis Symposium at the 13th Annual Meeting of the Federation of Analytical Chemistry and Spectroscopy Societies, St. Louis, MO, September 28–October 3, 1986

PREFACE

Preface
R.S. Lehrle 1
Analytical pyrolysis and environmental research
N. Simmleit (Taunusstein-Neuhof, F.R.G.) and H.-R. Schulten (Wiesbaden, F.R.G.) 3

1. NATURAL POLYMERS

Scope and limitations of several pyrolysis methods in the structural elucidation of a macromolecular plant constituent in the leaf cuticle of *Agave americana* L.
E.W. Tegelaar and J.W. de Leeuw (Delft, The Netherlands), C. Largeau and S. Derenne (Paris, France), H.-R. Schulten and R. Müller (Wiesbaden, F.R.G.), J.J. Boon and M. Nip (Amsterdam, The Netherlands) and J.C.M. Sprenkels (Terneuzen, The Netherlands) 29
Pyrolysis–direct chemical ionization mass spectrometry of some biopolymers in the positive and negative ionization mode
A.C. Tas, A. Kerkenaar, G.F. LaVos and J. van der Greef (Zeist, The Netherlands) 55
Evidence for oligomers in pyrolysates of microcrystalline cellulose
A.D. Pouwels, G.B. Eijkel, P.W. Arisz and J.J. Boon (Amsterdam, The Netherlands) 71
Initial application of desorption chemical ionization–pyrolysis–tandem mass spectrometry to structural analysis of carbohydrates
R.J. Helleur (St. John's, Canada) and R. Guevremont (Halifax, Canada) 85
Characterization of tobacco lignin preparations by Curie-point pyrolysis–mass spectrometry and Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry
M.A. Scheijen and J.J. Boon (Amsterdam, The Netherlands) and W. Hass and V. Heemann (Hamburg, F.R.G.) 97
Evidence of lignin residues in humic acids isolated from vermicomposts
C. Saiz-Jimenez (Sevilla, Spain), N. Senesi (Bari, Italy) and J.W. de Leeuw (Delft, The Netherlands) 121
Characterization by pyrolysis–gas chromatography of wheat straw fermented with white rot fungus *Stropharia rugosoannulata*
G. Chiavari, O. Francioso, G.C. Galletti and R. Piccaglia (Bologna, Italy) and F. Zadražil (Braunschweig, F.R.G.) 129
Characterization of *Agaricales* spores by pyrolysis–capillary gas chromatography and pyrolysis–gas chromatography/mass spectrometry
G. Papa and P. Balbi (Torino, Italy) and G. Audisio (Milan, Italy) 137
Analysis of caramel colours. Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry and simulation of pyrolysis–mass spectrometry
R. Hardt and W. Baltes (Berlin, F.R.G.) 159

2. SYNTHETIC POLYMERS

Pyrolysis–gas chromatographic study of end groups in poly(methyl methacrylate) radically polymerized in toluene solution with benzoyl peroxide as initiator
H. Ohtani, M. Tanaka and S. Tsuge (Nagoya, Japan) 167
Thermal decomposition of polymeric silanes
M. Biazsó (Budapest, Hungary), R. West (Madison, WI, U.S.A.) and T. Székely (Budapest, Hungary) 175

Thermometric behavior of polyolefins
T.P. Wampler (Oxford, PA, U.S.A.) 187
Pyrolysis–field ionization mass spectrometry of aliphatic polyesters and their thermal interactions in mixtures
B. Plage and H.-R. Schulten (Wiesbaden, F.R.G.) 197
Library of pyrolysis–gas chromatography data for synthetic polymers
C.G. Smith (Midland, MI, U.S.A.) 209
Development of a Curie-point thermal desorption system and its application to the analysis of atmospheric dusts
M.G. Kim, H. Inoue and T. Shirai (Yokohama, Japan) 217
Determination of styrene–butadiene and isoprene tire tread rubbers in piled particulate matter
T. Saito (Kanagawa, Japan) 227

3. DEGRADATION MECHANISMS

Photodegradation and photo-oxidation of synthetic polymers
B. Rånby (Stockholm, Sweden) 237
Evolution of the product yield with temperature and molecular weight in the pyrolysis of polystyrene
C. Bouster, P. Vermande and J. Veron (Villeurbanne, France) 249
Pyrolysis behaviour of a styrene–ethylene (styrene–hydrogenated butadiene) copolymer
G.D. Lamb and R.S. Lehrle (Birmingham, U.K.) 261
The pyrolysis of tetraethoxysilane over carbon and silica substrates
W.P. Hoffman (Edwards, CA, U.S.A.) and P. Ehrburger (Mulhouse, France) 275
Some mechanisms of flash pyrolysis of naturally occurring higher plant polyesters
E.W. Tegelaar and J.W. de Leeuw (Delft, The Netherlands) and P.J. Holloway (Bristol, U.K.) .. 289

4. FOSSIL FUELS

Pyrolysis of peat studied by thermogravimetry and Fourier transform infrared spectroscopy
M. Aho, P. Kortelainen, J. Rantanen and V. Linna (Jyväskylä, Finland) 297
A new apparatus to measure the reaction rates of wood and coal char in a high-pressure environment
J.R. Richard and J.P. Rouan (Orléans, France) 307
Analytical Curie-point pyrolysis–gas chromatography as a tool to characterize key parameters relevant to coal reactivity
P.J.J. Tromp, J.A. Moulijn and J.J. Boon (Amsterdam, The Netherlands) 319
Characterization of carbon deposits on used hydrotreating catalysts by Curie-point pyrolysis
J. van Doorn, J.A. Moulijn and J.J. Boon (Amsterdam, The Netherlands) 333

5. DATA HANDLING

Interpreting isothermal thermogravimetric data of complex reactions: application to cellulose pyrolysis at low temperatures
S.S. Alves and J.L. Figueiredo (Porto, Portugal) 347
Pattern recognition studies of Curie-point pyrolysis–gas chromatographic data from materials important to agriculture
R. Valcarce and G.G. Smith (Logan, UT, U.S.A.) 357

6. GENERAL

An approach to solid state kinetics
L. Carlsen, A. Feldthus and P. Bo (Roskilde, Denmark) 373
Advances in pyrolysis in combination with chromatographic and computer techniques
Zou Renjun (Shijiazhuang and Tianjin, China) and Lou Qiangkun, Zhang Bingchang, Cui Hongwu, Niu Fenghui and Liu Haicai (Tianjin, China) 383

Application of analytical pyrolysis to problems in art and archaeology: a review
A.M. Shedrinsky (New York, NY, U.S.A.), T.P. Wampler (Oxford, PA, U.S.A.), N. Indictor (Brooklyn, NY, U.S.A.) and N.S. Baer (New York, NY, U.S.A.) 393
